

QUADRILATERALS

A quadrilateral is a 2D shape.
It has four straight sides and four angles.
The angles in a quadrilateral add up to 360° .

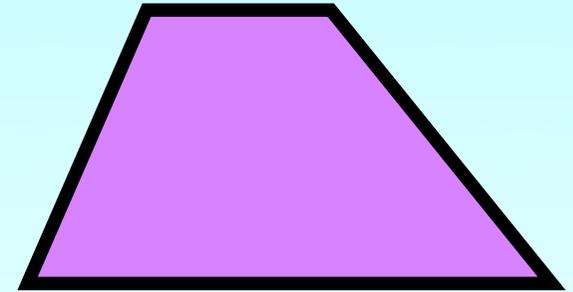

Square

All sides are equal.
All angles are right angles (90°).

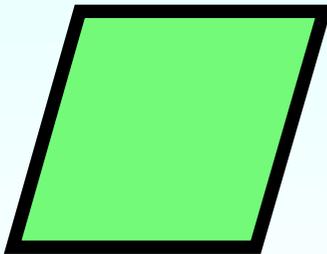

Rectangle

Opposite sides are the same length and parallel. All angles are right angles (90°).

Trapezium

One pair of parallel lines, which are opposite each other.

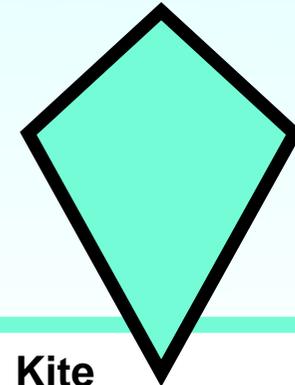

Rhombus

All sides are equal.
Opposite sides are parallel.
Opposite angles are equal.

Parallelogram

Two pairs of parallel lines.
Opposite sides are equal length.
Opposite angles are equal.

Kite

Two pairs of adjacent sides which are equal in length.
One pair is longer than the other.

Adjacent means 'next to each other'.
