

WALT: Recognise and identify acute and obtuse angles (L)

Friday, 12<sup>th</sup> March 2021

A right angle measures 90 degrees .... It makes a perfect corner.

Acute angles are less than 90°.

Obtuse angles are more than 90°, but less than 180° (a straight line)

Choose 3 colours, fill in the key, then colour the angles as appropriate.
